

**Bryan Fluech**  
**University of Georgia Marine Extension and Georgia Sea Grant**

---

Bryan Fluech is the Associate Marine Extension Director for the University of Georgia Marine Extension and Georgia Sea Grant Program. He is responsible for coordinating Marine Extension activities across the state with academic, management, industry, and community partners. His extension programs specifically focus on marine fisheries, coastal stewardship and sustainable tourism with the goal of promoting the economic, cultural and environmental health of Georgia's coast. Bryan has over 14 years of experience as a Sea Grant extension agent in Georgia and Florida, where he has engaged diverse stakeholders to conduct applied research, outreach, and extension programming.

Prior to working with Sea Grant, Bryan's career included teaching middle and high school science, working as naturalist, and conducting field work in freshwater and coastal wetlands. Bryan has a B.S. in Biology from the University of Tennessee and a M.Ed. in Secondary Science Education from the University of Florida.
